Portfolio: janus-ezam-portfolio.vercel.app | GitHub: github.com/janusezam

PROFESSIONAL SUMMARY

4th-year Information Technology student at Bukidnon State University with hands-on experience developing and deploying production web applications for local clients. Has a working grasp of system architecture, including MVC with Laravel and n-tier architecture with the MERN stack, and uses AI tools to improve productivity while building and debugging features. Strong communicator and dependable team contributor with experience presenting technical progress reports and collaborating across client and group projects. Seeking an internship in Web Development.

TECHNICAL SKILLS & WORKPLACE COMPETENCIES

- **Languages & Core:** JavaScript, PHP, Python, HTML, CSS, SQL
- **Frameworks & Libraries:** React, React Native, Node.js, Express.js, Laravel
- **Databases:** MySQL, MongoDB
- **AI & Developer Tools:** Google Gemini, Claude, Git, GitHub, Docker, Postman, Vercel, Render
- **Engineering Practices:** AI-assisted development, manual end-to-end testing, API integration
- **Workplace Competencies:** Deadline-driven execution, clear sprint reporting, cross-functional collaboration, technical documentation

PROJECTS

Salba: Emergency Reporting & Rescue Coordination Platform Group Capstone
Full-Stack Developer | React Native, Node.js, WebSockets, Python, AI/ML

- Developed a multi-platform emergency response system for Malaybalay City CDRRMO to streamline incident reporting, disaster assessment, and rescue coordination.
- Implemented real-time bi-directional GPS location tracking and instant notifications between dispatchers and citizens using WebSockets and React Native.
- Integrated AI/ML services in Python to automate disaster type classification and prioritize high-urgency incident reports.
- Tested web and mobile connections end to end across admin and user roles, and deployed the system for the CDRRMO client.
- Coordinated regularly with team leads and client representatives, delivering clear technical progress reports and feature demos on schedule.

Water Delivery Management System Solo Project
Full-Stack Developer | MongoDB, Express.js, React, Node.js (MERN)

- Built and deployed an end-to-end management web application for a local water refilling station, including inventory management, point-of-sale (POS), and delivery tracking.
- Developed the entire system independently, from backend routing and database schema design to the frontend interface, using an n-tier MERN architecture.
- Conducted manual testing across all user flows and deployed the live system for client use.

College of Technologies Thesis/Capstone Repository Group Project
Web Developer | Laravel, PHP, MySQL

- Built a web repository allowing instructors to upload verified capstone files for students to search, view, and download.
- Implemented frontend views and contributed to database queries and authentication features.
- Structured the application with Laravel's MVC architecture and validated form data to keep uploads and records consistent.

EDUCATION

Bukidnon State University Expected 2027
Bachelor of Science in Information Technology (4th Year)

ADDITIONAL INFORMATION

Certifications

Introduction to AI Literacy and Responsible Use Sep 2026
Mapúa University & CHED (ACHIEVE)

- Covered AI basics, responsible and ethical AI use, data privacy, and effective prompting.

Microsoft Artificial Intelligence Course: Azure AI Fundamentals Jul 2026
TESDA Online Program (NITESD)

- Covered machine learning, computer vision, natural language processing (NLP), and generative AI on Microsoft Azure.

CCNA: Switching, Routing, and Wireless Essentials Dec 2025
Cisco Networking Academy – Bukidnon State University

- Covered VLANs, inter-VLAN routing, STP, EtherChannel, DHCP, static routing, WLAN configuration, and LAN security.

- **Languages Spoken:** English, Filipino, Bisaya
- **Portfolio & Live Demos:** https://janus-ezam-portfolio.vercel.app/
